

COMPAREMAINE PRIORITIES 2.0

SCHEDULED RELEASE SECOND QUARTER 2016

Task	Description	Current Status
1. Facility Review Spreadsheet	Create individualized data worksheets for facility review that include the breakdown of total cost into professional and facility costs for all relevant procedures. Allow facilities one month to review data and provide feedback.	Sharing recommendation with stakeholders
2. Update cost data	Update cost data by 6 months for procedures currently listed on the site to July 1, 2014 through September 30, 2015.	Revising code to include Aetna reversal logic, new procedures, and new facilities
3. Update quality data	Update quality data for current measures (SIR, HCAHPS, Serious Complications)	Data available in April
4. Enhance procedure search functionality	Enhance procedure search functionality by adding search terms and making search parameters more flexible	In progress
5. Add additional procedures to current data display	Add colonoscopy, digital mammogram, and a few high volume labs	Preliminary recommendations available
6. Decide on inclusion of procedure volume	Based on previous work, our recommendation is not to include a procedure volume or count in the data display. If the consumers, stakeholders, and board feel strongly it should be included, we have recommendations to share.	Ready to share recommendation
7. Recommendation for detailed data display	Provide recommendation a detailed data display to be implemented in v3 with additional information such as procedure volume, payments to lead facility, and payments to other facilities	Reviewing internally
