

Payer Submitters

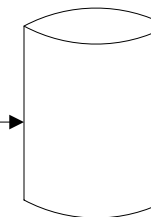

MHDO Portal

ETL Engine

Warehouse

1

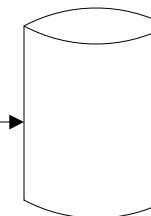

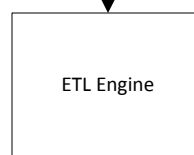

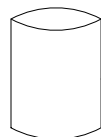

Registration

- User name password
- Contact(s) for communication regarding submissions
- Company Name, Division, Etc.
- Plan profile options
- Will attempt to carry over as much existing information as possible

2

File Submission

Either via automated peer to peer submission (submitter responsible for file encryption and compression based on MHDO specifications)

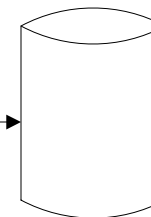

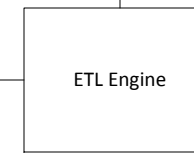

If everything passes (falls within profile parameters)

Or via simple commercial desktop utility (e.g., PKZIP) and then uploaded via the portal.

This desktop utility will be replaced with more robust desktop utility demonstrated in last PUG meeting at later date.

3

Review & Resubmission

Submitters can review errors and warnings. Based on these, the submitter can override warnings (with notes), make profile changes, or delete the submission in preparation for resubmission.

ETL engine will notify contacts specified in profile that submission review is complete.
