

# **Maine Health Data Organization Hospital Financial Information Part I**

## **2006 – 2010 Select Financial Information by Data Element/Ratio**

Comprised of tables for select data elements and ratios containing all of Maine's 39 non-governmental hospitals arrayed by hospital peer groups as determined by the Maine Hospital Association (MHA). The peer groups are based upon bed size, revenue, critical access designation (CAH), and specialty. When data are available, the tables include a comparison of the Maine (ME), Northeast, and U.S. median as reported from the 2013 INGENIX, "Almanac of Hospital and Financial & Operating Indicators", publication. The Northeast comparison includes the states of Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont.

## Profitability Ratios

**Provides information on the ability of the organization to produce a profit. Few hospitals could remain financially viable without a profit (or excess of revenues over expenses), especially over a long period of time. Cash flow would not be sufficient to meet normal cash requirements such as debt principal and investment in fixed or current assets. Six measures of profitability are included:**

- Operating Margin
- Non-operating Revenue Margin
- Total Margin
- Return on Equity
- Net Operating Income (Operating Surplus or Loss)
- Total Surplus/Deficit (Total Surplus or Loss)

## Liquidity Ratios

**Measures an organization's ability to meet short-term obligations, collect receivables, and maintain cash position. Most organizations that experience financial problems do so because of a liquidity crisis: they are unable to pay current obligations as they become due. Five measures of liquidity are included:**

- Current Ratio (without Board Designated and Undesignated Investments)
- Days in Accounts Receivable
- Days Cash on Hand (Current)
- Days Cash on Hand (Including Board Designated and Undesignated Investments)
- Average Payment Period (Current Liabilities)

## Capital Structure Ratios

**Capital Structure Ratios - Measures how an organization's assets are financed, and its capacity to pay for new debt. Many longterm creditors and bond rating agencies carefully evaluate capital structure ratios to determine an entity's ability to increase its amount of debt financing. Four capital structure ratios are included:**

- Equity Financing
- Debt Service Coverage Total
- Cash Flow to Total Debt
- Fixed Asset Financing
